

Public Safety

Dementia & Autism Program

The Cumberland County Dementia & Autism Program continues to be a vital community resource by allowing families to voluntarily create a record on their vulnerable loved ones in case of an emergency. Interested members should scan the QR code to sign-up to add their loved one.

Please find important functionality updates below:

RECORD NOTIFICATION

Administrators will now receive an email notification to the email address corresponding with their account whenever a new record is added. Admins can click on the notification to navigate to the records page to review the new record, after logging in. All Admins will receive new record notifications at this time, regardless of the jurisdiction. This functionality is currently for the Administrator role only, but may be expanded to Data Managers by request.

ADDITIONAL IMAGE FIELD

A record form now allows for additional image fields, one image per field. These image fields are for photos of birth marks, tattoos, scars, or alternative profile pictures. Please note, the Additional Image Field is not part of the automatic matching algorithm. The primary photo at the top of the form is the one that should be used as the front facing headshot, as it is the one used to locate matches in the database. The Additional Image Field should be used to store images that can confirm or further verify a potential match.
